

OXY-3 benefits at a glance

By installing the OXY-3 unit, it is possible to reduce the chlorine content in the water to 0,20 ppm which is 5 times lower than the current standard.

V Healthier		V Eco friendly	V Cost-saving	V Easy to install	V Universal
Less (bound) chlorine In the air in the water					
No risk of developing asthma in babies and toddlers ¹	Enables swimming for persons who are hypersensitive to chlorine	Toxic AOX values in the waste water remain far below the limit	Less rust on stainless steel in the swimming hall	Compact (80x60x195), fits in a doorway	Applicable in: Olympic pool, 25m pool, instruction pool, recreation pool, paddling pool ²
No risk of developing asthma/AHR in competition swimmers ¹	Less irritation of the skin, red marks, dry patches, itching	No chemicals	Less corrosion of the electrical components, PCs, digital screens in the swimming hall	Plug and play: one connection for incoming and one for outgoing water, one socket, one internet connection	Connectable to any existing installation ³
No risk of developing respiratory complaints in swimming pool employees ¹	Less irritation of the eyes	No gases	Less corrosion on water treatment and HVAC components in the technical area	SKID can be transported on a pallet carrier	Combinable with existing water treatment techniques
appropriate in the treatment of asthma patients	Less odour in hair, swimming costumes and towels	Reusable ² and recyclable	Reduced need for ventilation	Pre-installed, ready-to-use Start-up and control via internet by NoviNato Control Centre ³	Programmable according to needs ³
